7.3 Domestic laws, special requirements

The tread depth must be at least 1.6 mm all throughout the car on public roads in the Czech Republic. You have to use tires with a tread pattern molded, approved for public traffic and having homologation E, or the relevant regulations of the FIA set out in Appendix V SPR FAS ACR 2017.

7.4 Marking the tyres before start

Crews must cross the station for marking the tires, when they are leaving service to TC0 START, VIP zone. It is in the official service exit – highlighted in the road book.

7.5 Manual cutting tyres

Manual cutting is allowed only in the service area.

7.6 Sanction

Any breach of the tyre regulations will be submitted to the Stewards.

8. FUEL

It is permitted unleaded fuel with a maximum lead content of 0.013g/l.

9. RECONNAISSANCE

9.1 Reconnaissance registration

Before the beginning of reconnaissance each crew announces a factory make and a registration plate number of its reconnaissance car. The crew receives identification for its car (starting numbers), a reconnaissance time card. Starting number must be affixed in right upper part of the windscreen (remains here until rally finish – attend to entry to the service area) and in both rear side windows during reconnaissance at all the times (after this period have to be removed from the car). Only the cars specified in art. 25.1. SPR FAS AČR (insured as required by law) are allowed. Changes must be announced to the CoC (phone + 420 776 866 809).

9.2 GPS for reconnaissance

All cars used for reconnaissance must be equipped with a GPS unit for reconnaissance, which is able to record the progress of reconnaissance and compliance with traffic rules. The crew receive the GPS when they receive the road book and they return it when they receive GPS for the rally (unless the crew will be instructed otherwise). Failure to use this device, attempted falsification, manipulation or interference with the tracking device assigned to the reconnaissance car or work, making it impossible to record data due to external interference, it will be reported to the stewards. For late handover of GPS unit the crew will be penalized – 1.000 CZK. For lost GPS unit the crew will be penalized by 3630 CZK (without VAT). The person responsible for monitoring the recce will be listed on the Official Notice Board.

Appendix 5 - DRIVERS SAFETY EQUIPMENT

1. Flame-resistant clothing

In rally special stages must all drivers and co-drivers wear overalls as well as gloves (optional for co-drivers), long underwear, a balaclava, socks and shoes homologated to the FIA 8856-2000 standard (Technical List N° 27). See art. 6.1. chapter E of National Regulations.

2. Helmets

In rally special stages must all drivers and co-drivers wear helmets with the FIA standards and listed in FIA technical sheet no. 25 (www.fia.com).

3. Frontal Head Restraint (FHR e.g. HANS®)

According to article 3, chapter III Appendix of FIA RRR is the Frontal Head Restraint obligatory for all drivers and co-drivers. Homologated FHR systems are listed in the FIA Technical List N°29 according to FIA 8858 standard. FHR must be used only with element approved by the FIA (article 3.2, chapter III Appendix L of FIA RRR).

4. Safety belts

Drivers and co-drivers must be fasten throughout the driving (SS and rally track) in the seats with safety belts which are approved by specification of Appendix J (art. 4, chapter III Appendix L of FIA RRR). According to art.253/6.1 Appendix J must be all cars equipped with safety belts with homologation FIA 8853/98. It is strongly recommended to use safety belts equipped with lock type "P" /push-button/ with pushing mechanism. In the car must be permanently two knives on belts. They must be easily accessible for driver and co-driver in their seats with seat belts fastened.

5. Drivers safety equipment card

The competitor filled the Drivers safety equipment card at scrutineering. You can find it on the website: www.autoklub.cz - folder: Forms.

Appendix 6 - Monitoring GPS system ONI®

1. General provisions

All competition cars have to be obligatorily equipped with the ONI® tracking system. The GPS tracking system will be rented to the competitors for **non-reversible fee** 100 CZK/pc a 300 CZK/holder.

Guarantee for the return will be the driver's license or 1.000 CZK deposited with the GPS system administrator. He hands it back after returning of the unit. Eventual destruction, non-return or damage of the unit has to be paid for by the competitor to the provider in accordance with the approved price list.

2. Distribution of the ONI® tracking systems

To install the ONI® tracking system it is necessary to fit a GPS unit holder assembly into each rally car before the scrutineering. The assembly contains the following parts:

- tracking unit bracket with cables and fitting accessory
- 2 aerials (roof and inner ones)
- control features containing:
 - button to cancel the alarm / call for help / yellow flag
 - LED indicator

Cars of **foreign competitors** and other cars with one time starts will receive the holder assembly immediately before the event. Competitors can pick it up at the administrative checks. At the end of the rally or after withdrawal from the rally, the tracking units (or the whole tracking system) have to be returned to the system provider.

3. Installation of the bracket assembly in the car

3.1 To fit the tracking unit bracket, the roof and the inner antennas and the individual control features, it is necessary for the competitor to meet exactly the Installation Manual of the manufacturer (the NAM system, a.s.), to keep the unit in good condition, and to protect it against damage and contamination (especially the connectors) all over the time.

3.2 Foreign and one-time rally participants will receive a modified unit equipped with magnetic roof antenna and with control features which contained in one common box. The competitor has to choose a suitable place for fitting the control unit within the reach of both crew members and he has to prepare everything for its installation.

4. The unit operation during rally

To operate the unit, the crews have to meet all instructions as mentioned in the User's Manual issued by the manufacturer (NAM system, a.s.).

Operation during rally (after installation of unit):

Operation during events on SS:

All next functions are possible only in "SS" mode.

• Accident (detection of crash)

- Alarm is generated automatically immediately after crash and siren sounds
- Alarm can be cancelled by short push of button (1 second) in case the help is not necessary
- In case the alarm won't be cancelled than it's taken as request for help

• Unplanned stop

- Siren will sound after 30 seconds
- Alarm can be cancelled by short push of button (1 second) in case the help is not necessary
- In case the alarm won't be cancelled than it's taken as request for help

• Request for help

- In cases when immediately help is needed on SS
- Request for help can be made by long push of button (3 seconds)
- Siren will sound as confirmation of send the message

• Yellow flag

- In case the yellow flag is displayed on SS, the Rally Control sent also to selected crews impulse for flashing of LED diode installed on sight on driver and co-driver. After the yellow flag starts flashing press the button for 1s to accept it. The LED flashes switches off, hook off also. The confirmation time is sent to the Rally Control. After immediately reduce speed and with non-racing speed continue until the end of SS. Electronic yellow flag has the same value as yellow flag displayed by marshals in radio points.

Attention: non cancelling the alarm is considered as request for help!!!

Monitoring GPS system ONI®

The system monitors speed online at any time of reconnaissance. Each crew pick up the GPS unit together with Road book. Guarantee for the return will be the driver's license or 1.000 CZK deposited with the GPS system administrator. Installation of speed control unit, its involvement and use during recce is obligated for all the time of the reconnaissance (see art. 3 Reconnaissance). For controlling the speed are used units NCL 21.

NCL 21 unit will start automatically at a reported day and in the beginning of reconnaissance. It is set to charging from batteries for 24 hours if the unit is moving and 80 hours if the unit is not moving. Position sensing is started by the shaking. Location is scanned at a fixed interval of 10 sec. and the data are send every minute to the app. The unit is not connected to the power supply. The unit can be on metal surface, in the unit are implemented the magnets. The unit turns of after full discharge.

The organizer has to fill the form, enclosed in carrying case, which units don't work. Manufacturer control only defective units from this form. If you don't use this unit, you will be penalized. Any attempt to tamper with, manipulate or interfere with tracking unit for recce will be reported to the Stewards (they can impose a penalty (incl. declining the start). Decisions are done by the CoC. For the higher speed than limit can be competitor sanctioned (see Art. 20.2 SPR FAS ACR).
